

VR9700 excitation with COLA reference

Option 1: Q2 uses its Analog In for the excitation reference

■ Q2 / I/O

■ Ommatidia can provide

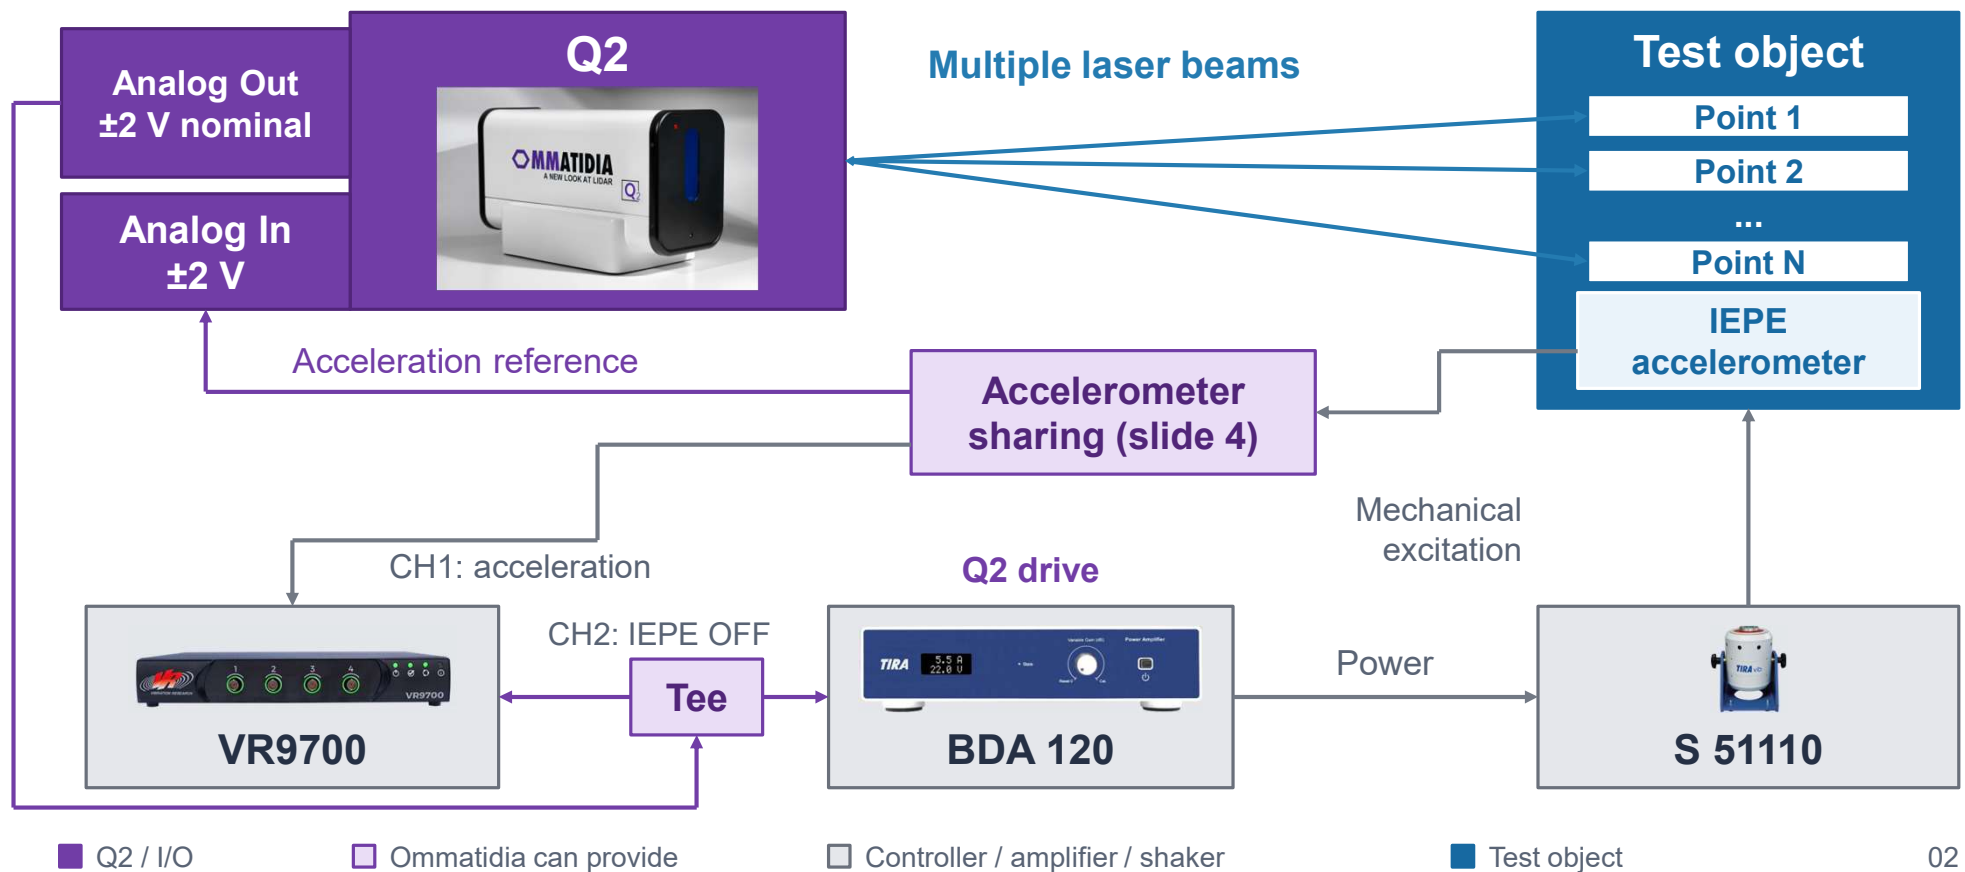

■ Controller / amplifier / shaker

■ Test object

01

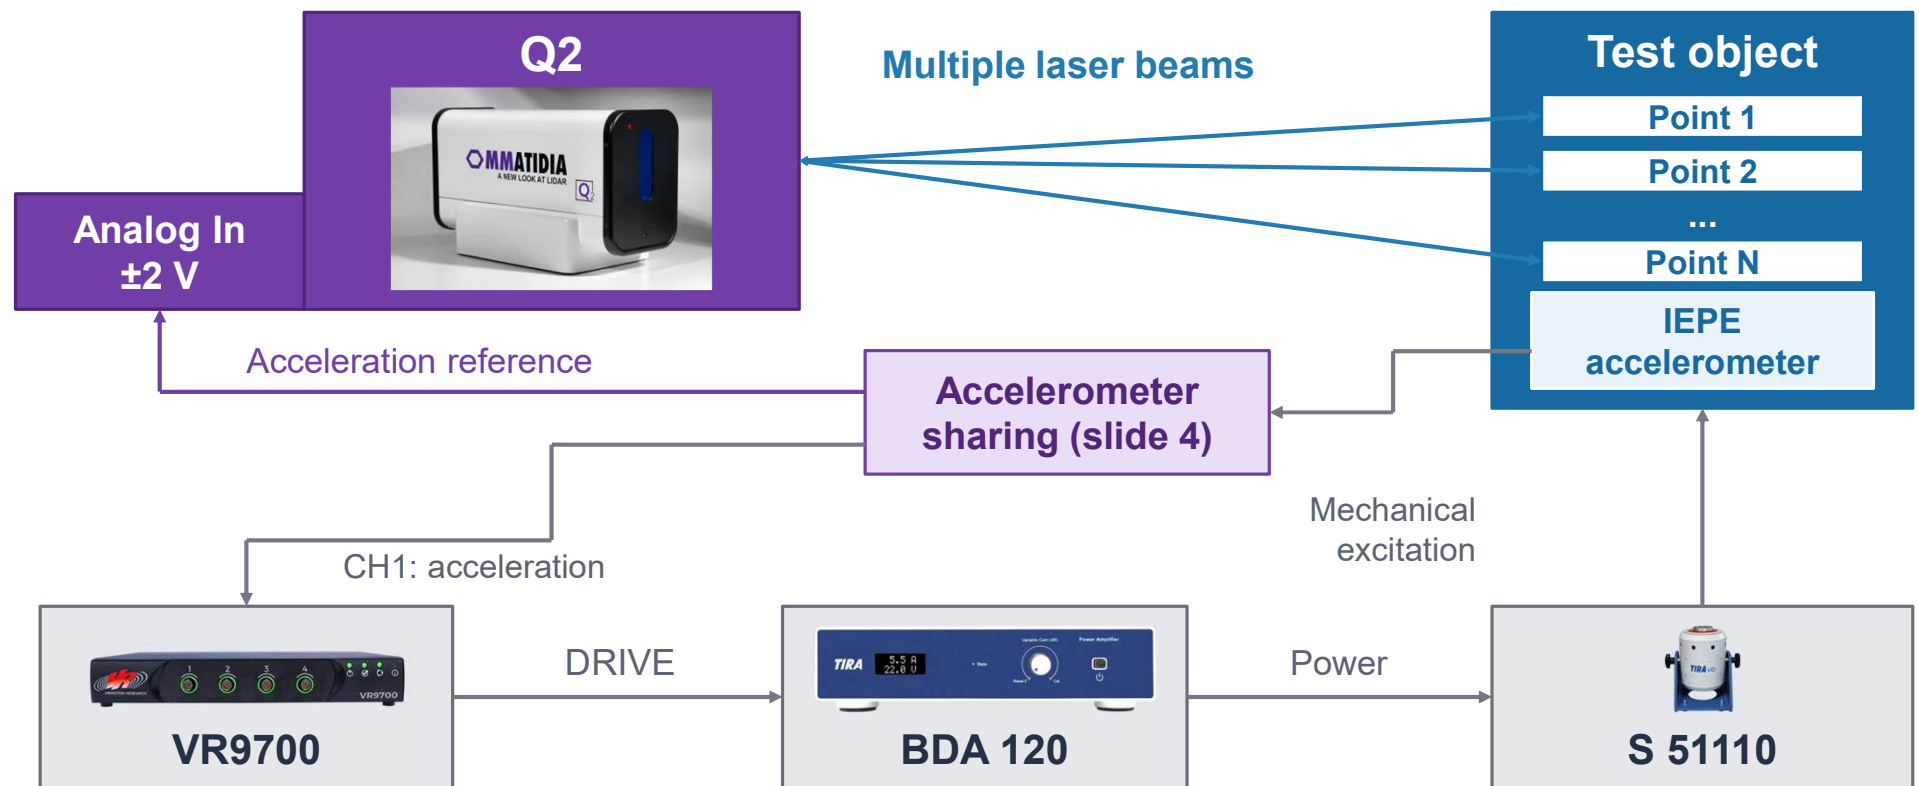

Q2 excitation with shared accelerometer

Option 2: Q2 generates the excitation reference and records shared acceleration for FRFs

VR9700 excitation with accelerometer reference

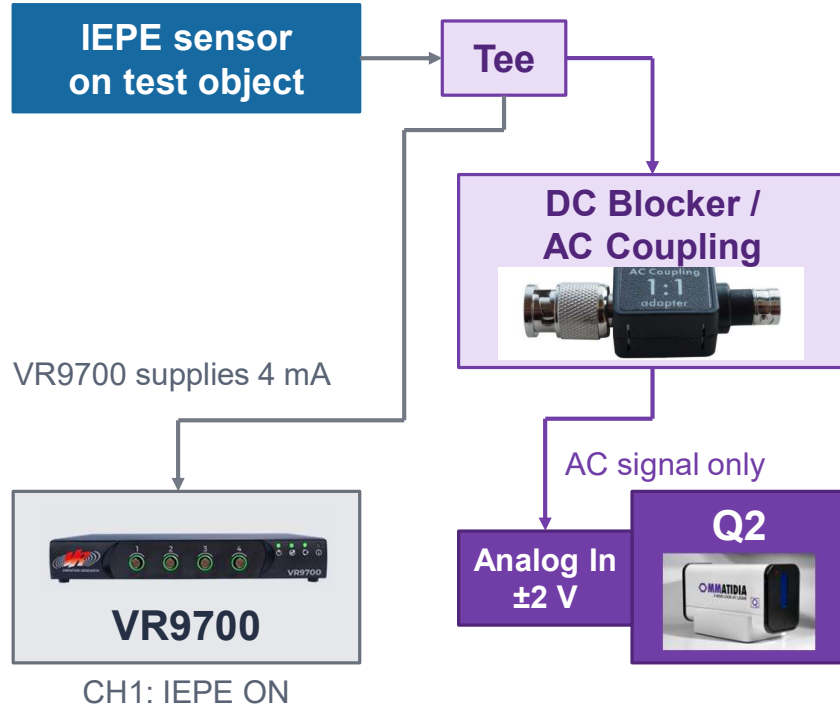

Option 3: Q2 uses measured acceleration for synchronization and motion / acceleration FRFs

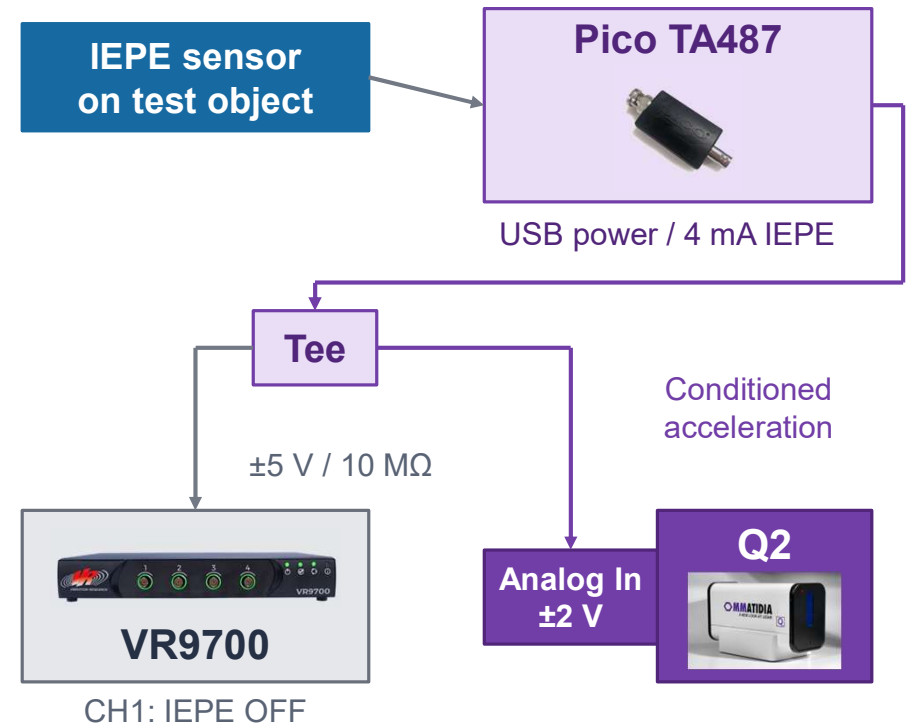

Two ways to share the accelerometer

Technical detail for options 2 and 3: each circuit feeds the single Q2 Analog In and VR9700 CH1

A. VR9700 supplies IEPE power

B. External TA487 supplies IEPE power

■ Q2 / I/O

■ Ommatidia can provide

□ Controller / amplifier / shaker

■ Test object
